

1. K-LOVE serves our family with moral, ethical and positive support that we can not find in America today!
2. The effect on the local community if K-LOVE were to be displaced by an LPFM broadcaster providing other programming would only cause a catastophic of events, we have so very much negative, evil and bad things to live with everyday; without something that is structured and fine tuned for anyone to listen and feel the holy spirit surrounding them such as Klove radio station, We would hate to see how the world around us could disengrate even farther than it is now!
3. Our belief is that if the public started listening to K-LOVE they would experience the revelation that there is "something good" out in theworld today, and so very many lives have come to the lord through the music that is played on this station; when that happens then God is reigning a bigger population which we hope to overcome and invite everyone to enter into the kingdom of heaven through his son Jesus Christ! The radio station is "REAL" to what is going on outside in the world today, it offers a chance for people to realize that they do not have to live that way on their own that thier is someone out their who would be GLAD to walk beside them or even carry them in their time of need! We cannot express the importance of keeping this radio station as it is without condeming them for all the "GOOD" that they do for any individual who listens!
